## **Dressed to Kill\_Second Edition: The Link Between Breast ...**

In 1995 the first edition of Dressed to Kill: The Link Between Breast Cancer and Bras revealed the disturbing results of a study that showed a notable correlation between the wearing of bras and the incidence of breast cancer. The women studied who wore bras 24 hours a day were 125 times more likely to have breast cancer compared to bra-free women.

## **Dressed To Kill: The Link Between Breast Cancer and Bras ...**

Dressed To Kill: The Link Between Breast Cancer and Bras. Corsets bound women for centuries, to the point of disease and death. Constriction is not a good thing for circulation. Nevertheless, this fashion of body shaping went on for centuries, despite its toll on women's health. Bras are really breast corsets.

## **Dressed To Kill? The Link Between Breast Cancer & Bras**

Where there are no bras, there is virtually no breast cancer. We had written about this, and the results of our 1991-93 Bra and Breast Cancer Study, in our book Dressed To Kill: The Link Between Breast Cancer and Bras (ISCD Press). Our study was conducted on approximately 4700 U.S. women, about half of whom had breast cancer.

## **Dressed To Kill**

Dressed To Kill. The Link Between Breast Cancer and Bras by Sydney Ross Singer and Soma Grismaijer. Reveals the link between bras and breast cancer, explaining in non-technical language how the restrictive nature of bras inhibits the lymphatic system and arguing that the correlation is four times greater than smoking is to lung cancer.

## **Dressed to Kill: The Link Between Breast Cancer and Bras ...**

So "The connection of bras to breast cancer, however, could be more than a correlation. Given the lymphatic mechanism we described, the relationship could be causal.". Cut off your cleaning mechanisms and you are asking for trouble, ask anyone with liver or kidney failure.

## **Dressed to Kill (book)**

Dressed to Kill (book) Jump to navigation Jump to search. Dressed to Kill is a 1995 book by Sydney Ross

Singer and Soma Grismaijer that proposes a link between bras and breast cancer. According to the authors, the restrictive nature of a brassiere inhibits the lymphatic system, leading to an increased risk of breast cancer.

### **Could There Possibly Be a Link Between Underwire Bras and ...**

Their other findings included: Women who wore their bras 24 hours per day had a 3 out of 4 chance of developing breast cancer. Women who wore their bras for more than 12 hours but not to bed had a 1 in 7 risk for breast cancer. Wearing a bra less than 12 hours per day dropped breast cancer risk to 1 in 152.
